

## How to secure the car sign to the window

1. Put the sign on the window where you want it with the following things in mind.
  - a. Preferably on the inside of the window to protect it from the wind and elements.
  - b. Near the edge of a window.
  - c. Do not cover the drivers field of vision if in a parade and/while driving the car.  
(this should be obvious)
2. Slide the clip (flat side out) over the window and the sign towards each end of the sign as shown below.

(Note: the clips are tablecloth clips available from Walmart outdoor section if you misplace one). Also available in metal.
